

Opening for Post Doctoral Research Associate

A post-doctoral research associate is sought to work on a short-term project concerning flow through aneurysms. The objectives of the study are to fabricate realistic aneurysm models, to perform velocimetry measurements within the model systems, and to analyze the results.

The duration of the position is for approximately two months. Starting date is anticipated as December, 2009. Candidates must possess an earned doctorate in engineering or applied science. Candidates must have demonstrated experimental, analytical, and communication skills. In addition, the successful candidate should be self motivated and able to work independently.

Interested individuals are encouraged to contact Professor Ellen Longmire. All applicants must apply online in order to be considered. To apply online, please go to <https://employment.umn.edu> and search for Requisition Number 162470.

The University of Minnesota is an EOE/AA employer and educator.
